DESCRIPTION

On this date the group of students sat in a room in DETI and debated problems with their application and project. At first the group decided to record some videos to test reidentification (a problem was detected in the feature extraction, and was soon corrected, from BOX -> Segmentation).

Some problems with the frontend and some merges in GitHub were corrected.

The group also tested successfully biometric detection in a video through a picture.

TODO

- **Front end backend integration (In progress)**
- **Suspect selection frontend (Done)**
- **Backend tests (Done) - More tests can be added**
- **Frontend, coverage (In progress)**
