

Minutes

Board meeting

DATE	March 17th
TIME	14:00 PM - 14:45 PM
IN ATTENDANCE	Gabriel Santos, Francisco Albergaria, João Gaspar, David Amorim, Francisca Silva

TOPIC

Discussion on work done and work to be done.

DESCRIPTION

One of the group members pointed out some flaws with the yolo models that were trained, since they weren't properly detecting the weapon.

The group discussed some changes in the front end that need to be added, especially in the account password changing part, by sending an email to ask for a password change where you require the last one. Logs for users need to be added.

Basic discussion about API progress.

One of the group members spoke about the done setups and needed ones, (Broker needs setup, load balancer is already done, and GPU worker structure, fast API). All this to weapon detection.

Calendar review.

Video player page debate.

Husky problems for pretty in GitHub and compiling errors.

Diagram corrections.

TODO

- **Backend implementation with frontend**
- **Backend**
- **Model training**
- **Database mocking**
- **Broker**
- **GPU workers**

NEXT MEETING

To be decided...
